

CRAFT Construction

Premium Building & Design Services

Where Vision Meets Precision

Scan for Location

Why Choose CRAFT

- ✓ Engineer-led precision and craftsmanship
- ✓ Transparent cost and schedule control
- ✓ Premium supplier network and warranties
- ✓ Sustainability integrated by design
- ✓ White-glove client service from start to finish

A refined, professional approach that protects quality, budget, and timelines.

Team & Expertise

Leadership

Er. Subham Sahu

M.Tech (Structure)

Core Capabilities

- Structural design & value engineering
- Project and cost management
- Interior detailing & finishes
- Safety & quality assurance

Engineer-led teams ensure precision from concept to handover.

The Art of the Built Environment

True luxury is not defined solely by the cost of materials, but by the seamless execution of a vision. In the high-end market, a gap often exists between the architect's dream and the builder's reality—a friction that compromises quality and timeline.

We bridge this divide. By integrating premium design with rigorous construction management, we eliminate the friction, ensuring the home you envision is the home we deliver.

Defining Our Standard

CRAFT

Collaboration: We dismantle the silos between architects, designers, and trades, ensuring all parties work in unison toward a singular aesthetic goal.

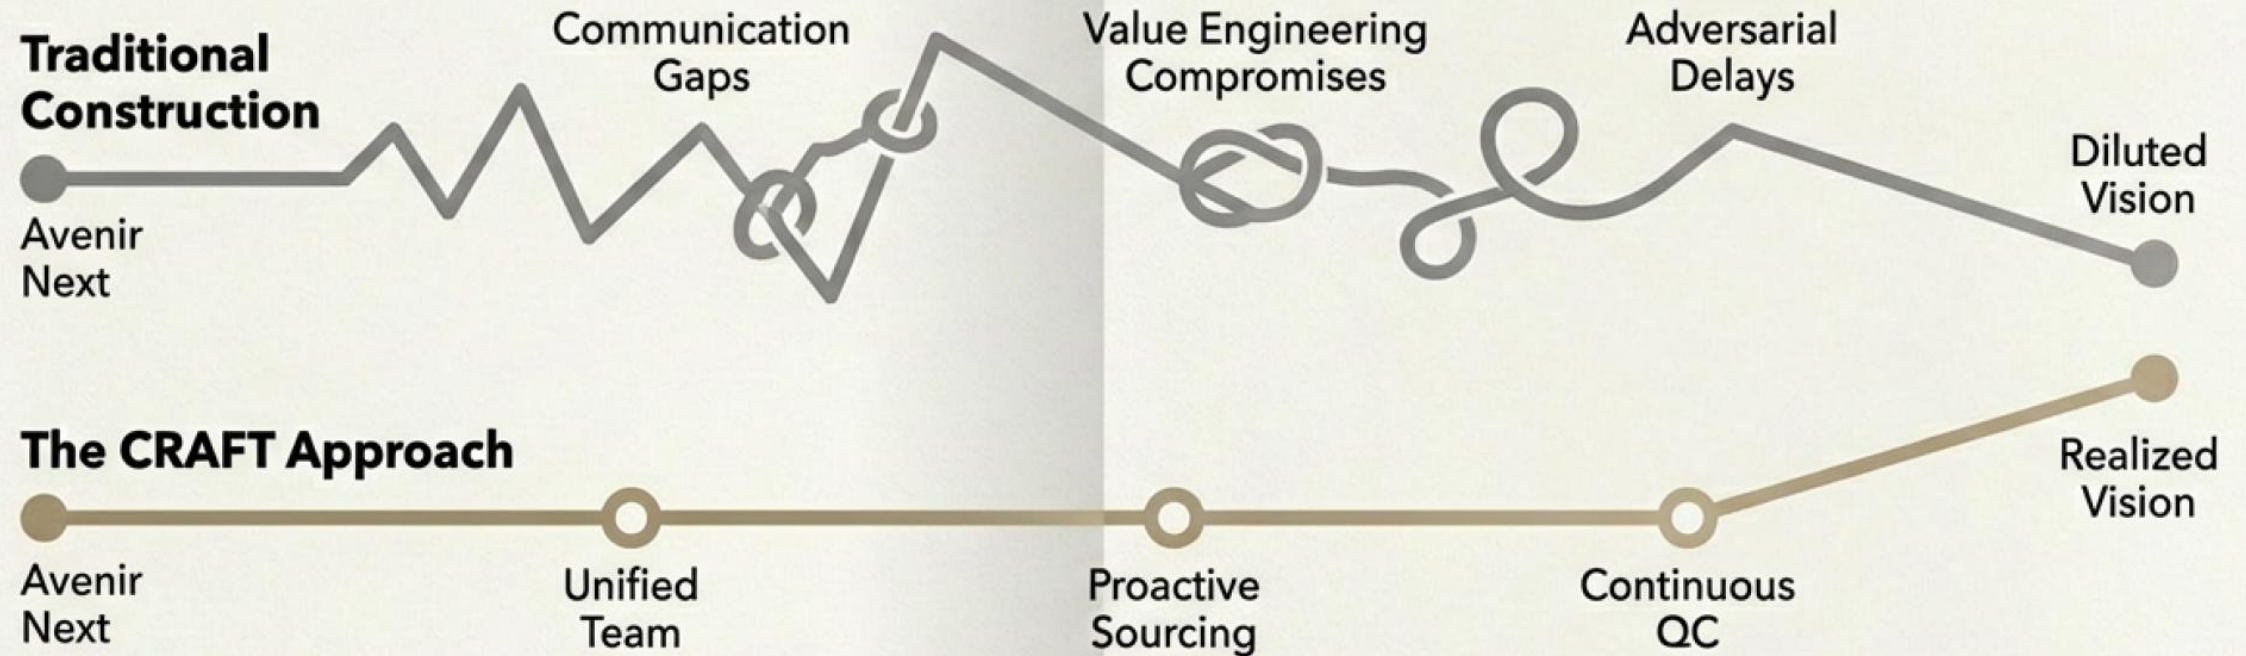

Rigor: We apply uncompromising adherence to engineering standards and timeline management. Precision is not optional.

Aesthetics: A design-first approach governs every structural decision, ensuring mechanical necessities never compromise visual beauty.

Function: We create beauty that performs. Our builds are designed to withstand real-world conditions with grace.

Transparency: We practice open-book financial stewardship and clear, proactive communication throughout the lifecycle.

The Integrated Advantage

When the builder understands the design intent from Day One, value engineering happens naturally, not as a compromise. We align the budget with the dream before the ground is broken.

From Concept to Keys

Phase 1: Discovery & Feasibility

Avenir Next
Site analysis, budget
alignment, and
establishing the
core vision.

Phase 2: Design & Development

Avenir Next
Architecture, interior
material selections,
and engineering
documentation.

Phase 3: Construction & Execution

Avenir Next
Project management,
artisan trade coordi-
nation, and rigorous
quality control.

Phase 4: Handover & Stewardship

Avenir Next
White-glove closeout,
systems training,
and long-term
maintenance planning.

Architectural Integrity & Pre-Construction

We speak the language of architecture. Our pre-construction phase is dedicated to identifying constructability challenges before the foundation is poured. We utilize 3D visualization, extensive material sampling, and permit acquisition strategies to ensure the design you fall in love with is the home you actually live in.

Precision Execution

- **Site Hygiene**

We maintain a clean, safe, and organized job site, respecting the property as a future home, not just a work zone.

- **Trade Vetting**

We employ only master tradespeople for specialized tasks. No general labor is used for finish work.

- **Quality Control**

We conduct multi-point inspections at every structural milestone to ensure zero defects.

Financial Stewardship & Transparency

	_____	_____	_____	_____

Open Communication: We provide detailed weekly reporting on budget versus actuals, ensuring you are never in the dark.

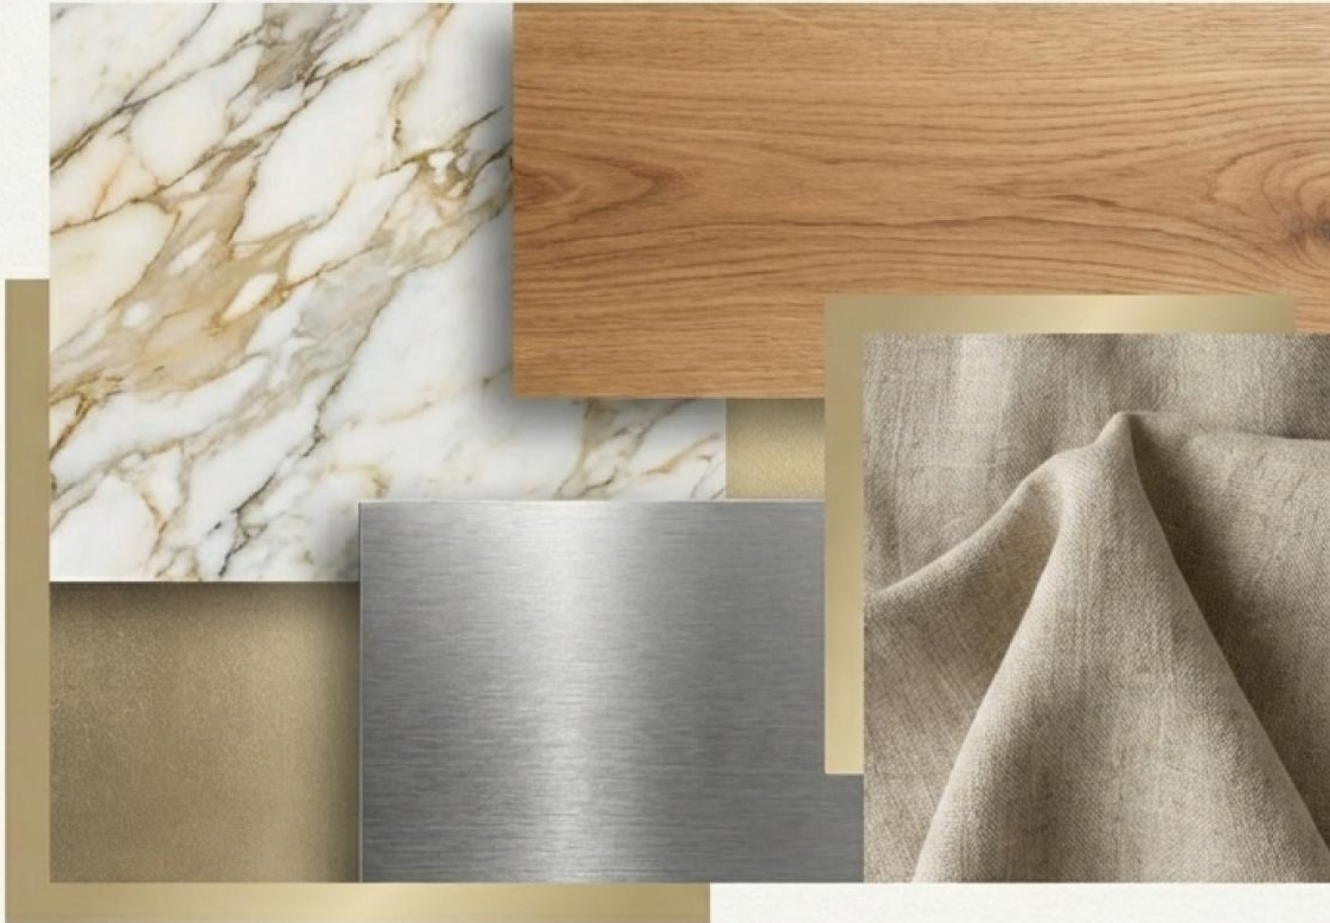

Value Management: We proactively suggest high-impact alternatives to maximize your budget without sacrificing the aesthetic intent.

No Surprises: We are committed to rigorous change-order management. Costs are approved before work begins, not after.

Sourcing the Exceptional

We source globally to find materials that define character.

Whether it is Italian marble, locally milled heritage timber, or custom-fabricated steel, we handle the logistics of luxury to bring rare elements into your space.

Curating the master trades.

A general contractor is only as good as their worst subcontractor. We do not bid out to the lowest option. Over years of operation, we have vetted and retained a tight network of master artisans—masons, joiners, electricians, and finishers—who share our obsession with quality. We manage them so you don't have to.

Commercial & Bespoke Spaces

Retail & Showrooms: Spaces designed to sell and impress, focused on lighting and customer flow.

Hospitality: Restaurants and boutique hotels requiring extreme durability matched with high style.

Executive Offices: Workspaces that reflect corporate prestige and brand identity.

Project Visibility

Digital Portals: 24/7 access to schedules, daily logs, and site photos from anywhere in the world.

Progress Tracking: Regular site meetings (virtual or in-person) to review milestones.

Decision Management: A structured schedule for client selections ensures materials are ordered on time, preventing critical path delays.

The White-Glove Experience

We understand that construction is invasive. Our service layer includes:

- Concierge-level coordination for renovations in occupied homes.
- Proactive neighbor relations management to minimize friction.
- Strict adherence to noise control, dust containment, and daily cleanliness protocols.

Beyond the Build

Our relationship does not end when the invoice is paid. We provide:

- **Comprehensive Handover:** Detailed manuals for all installed systems, finishes, and appliances.
- **Warranty Support:** Rapid response teams for any settling issues or adjustments needed post-move-in.
- **Maintenance Programs:** Optional ongoing care plans for complex home systems to protect your investment.

Begin the Conversation

Your vision deserves a partner capable of realizing it without compromise. Let us discuss the potential of your next project.
